Dear Sir

I would like to bring to your attention that we oppose to the plan of farm & animal registration & animal tracking.

If the concern is great enough to have animal tracking due to decease & health issues why do we open up markets to Canada and other countries where they have deceases.

Our biggest concern is that we in the Amish churches do not take part in such. It is leading to the mark of the Beast according to scripture we have the right to strongly oppose to this plan that wants to take place.

Thank you for your effort in helping us in this issue.

Sincerely
Eli D Miller
