Comment : opa-2004-0008 - it is clear that u.s. oil rigs are not being built to high enough standards. i note that hurricane ivan just went through and that some oil rigs simply fell apart, resulting in endless pollution and waste for our citizens.

it is time that standards for building are upgraded so that these structures resist such hurricanes. with global warming, it is clear that we will have more such events and lack of planning by this agency needs to be addressed.
