* Compliance with the EPA Residential Lead in Buildings Education and Awareness Requirements in St. Louis, Missouri - EPA Region Seven seeks public comments by November 22, 2004 on the paperwork and regulatory burdens associated with the conduct of an Information Collection Request, titled "Region 7 Lead Education and Awareness Project in St. Louis, MO," EPA ICR Number 2161.01 - In seeking public comments on the ICR, EPA notes that "... EPA Region 7 and the Office of Compliance (OC) within the Office of Enforcement and Compliance Assurance (OECA) are planning to conduct a performance baseline survey and follow-up survey for the Lessors and Lessees sectors. The OC is interested in having a baseline performance survey conducted and compliance assistance needs assessed for the Lessors sector. In addition, OC is interested in assessing the awareness and behavioral change of Lessees through a survey. There are three main purposes for these Lessor and Lessee surveys: (1) To determine a baseline level of regulatory awareness of and compliance with the 'Residential Lead-Based Paint Hazard Reduction Act of 1992' (Title X) and the 'Requirements for Disclosure of Known Lead-Based Paint and/or Lead-Based Paint Hazards in Housing' rule (Disclosure Rule) ... (2) To determine the effectiveness of the Department of Housing and Urban Development's (HUD) education and outreach efforts; (3) To determine whether lessees are reading and understanding the Protect Your Family From Lead In Your Home pamphlet and whether they are implementing methods to reduce lead exposure as a result ... The EPA Region 7 is planning targeted Disclosure Rule inspections in high risk areas of St. Louis, Missouri during FY2005 and/or FY2006. The activities planned under the Statistically Valid Compliance Assistance Rate study are designed to determine the baseline rate of lessors' compliance with the Disclosure Rule and whether lessees are reading and understanding the Protect Your Family From Lead In Your Home pamphlet and implementing methods to reduce exposure to lead ... The OECA has adopted a sector approach for many of its compliance assistance activities. The lessor sector is an example of a sector for which EPA has focused many of its compliance assistance activities. There is considerable debate as to the extent of regulatory compliance, the need for additional compliance assistance, and the effectiveness of compliance assistance methods and materials developed for this sector ... The results of the survey will provide OECA with information on compliance assistance applicable to this sector and information from which to measure the success of OECA's compliance assistance programs ..." - A paper copy of the ICR is available from, and questions about it may be directed to, Carolyn Scully, in the EPA Office of Enforcement and Compliance Assurance Docket Center at 202 566 1752; e-mail: Scully.Carolyn@EPA.gov - EPA September 22 Federal Register: <http://a257.g.akamaitech.net/7/257/2422/06jun20041800/edocket.access.gpo.gov/2004/04-21285.htm>

FIEN is a regulatory and policy e-mail alert service for food industry

trade associations, professional societies, food and ag departments of universities and colleges, government offices, and consulting and law firms. Each subscriber to FIEN service may assign five representatives of its organization to the FIEN Distribution Lists at no additional charge.

When information comes to the attention of FIEN that is believed to be of interest to those whose names are on one or more of the FIEN Subject Matter Distribution Lists, the information is summarized and distributed in as timely a manner as possible.

Typical areas of FIEN information distribution include biotechnology, food safety, bioterrorism, nutrition, agricultural research, crop protection, hazardous substances management, environmental protection (clean air and water and drinking water), occupational safety and health and risk assessment.

The individual FIEN distributions are collated each day into a "FIEN Food Environmental Daily" and each week into a "FIEN Food Environmental Weekly." These newsletters are intended to be used as a reference and backup, and as a source of information on topics for which an individual has not had their name placed on a specific subject matter list.
